Core Advantages and Functions

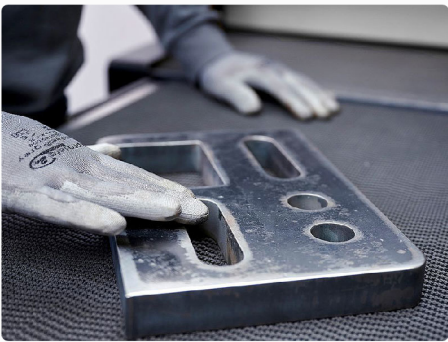

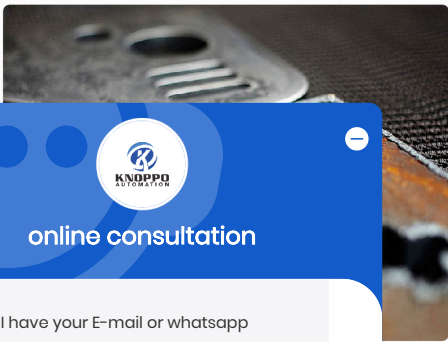

Easy to operate with parameter memory function; capable of edge rounding, removing burrs, slag, oxide skin, and corner rounding; equipped with automatic magnet cleaning and adsorption cavity automatic cleaning; high-pressure vacuum adsorptive worktable suitable for small parts processing.

Conveying Mode and Application Scope

Adopts turbine vacuum adsorption and conveying via high-damping wear-resistant rubber belt; applicable to handling oxide skin, slag/burrs from laser, flame, plasma cutting, as well as burrs and sharp edges from NCT, stamping, cutting processes, and can process materials such as stainless steel, carbon steel, and copper.
