

give me the datasheet for Wholesale RFID Reader Writer 860-960 Mhz HID mini usb interface desktop smart card reader emulated keyboard output plug and play, model number UHF100U-TC

I'm pulling together the manufacturer-style specs and checking for a reliable source so I can give you a clean datasheet-style summary rather than a guessed one.

Thought for 15s

I could not verify an **official manufacturer PDF datasheet** for **UHF100U-TC**, but I did find matching vendor listings and compiled the available specs into a **datasheet-style summary** below. Some fields vary across sellers, so I marked those clearly. Alibaba +2

UHF100U-TC — Datasheet-Style Summary

1. Product Overview

Model: UHF100U-TC

Product type: Desktop UHF RFID reader/writer with USB interface and keyboard-emulation output

Use case: Plug-and-play RFID tag reading for PC-based applications such as asset management, warehousing, inventory, POS, forms, and office software. The keyboard-emulation mode lets tag data appear directly in the active cursor field like a barcode scanner. Hyper RFID +1

2. Main Features

- UHF RFID operation in the **860–960 MHz** band. Alibaba +1
- **USB / USB Type-C** desktop connection. One source specifically lists **USB Type-C**. Alibaba +1
- **Plug and play**, no extra driver or dedicated software required for keyboard-emulation use. Hyper RFID
- **Keyboard emulation / HID-style output**, so EPC or tag data can be typed into the active software field automatically. Hyper RFID
- Supports **LED** and **buzzer** prompts. Alibaba +1
- Built-in compact antenna design for short-range desktop reading/writing. Amazon

3. Technical Specifications

Item	Specification
Model	UHF100U-TC
RFID band	860–960 MHz Alibaba +1
Supported protocol	ISO 18000-6C / EPC Gen2; some similar listings also mention ISO 18000-6B support, but the strongest direct match shows ISO 18000-6C clearly. Alibaba +1
Interface	USB / USB Type-C Alibaba +1
Output mode	Keyboard emulation; one source says output format is adjustable. Hyper RFID +1
Reading distance	Seller listings vary: one matching desktop listing says 0–100 cm depending on tag/environment ; a very similar USB desktop reader lists read 0–180 mm, write 0–80 mm . Treat range as seller-dependent and highly tag-dependent. Alibaba +1
Write capability	Reader/writer type; actual write range is short and tag-dependent. Amazon
Transmit power	One similar USB desktop model lists 0 to 13 dBm adjustable . Amazon
Supply voltage	DC 5 V Alibaba +1
Power consumption	≤ 4 W on one matching vendor page. Alibaba
Indicators	LED and buzzer Alibaba +1
Material	ABS + acrylic on one matching listing. Alibaba
Operating temperature	One similar desktop USB model lists -10°C to +60°C . Amazon
Storage temperature	One similar desktop USB model lists -25°C to +80°C . Amazon
Dimensions	One similar desktop USB model lists 105 × 70 × 11 mm . Amazon
Weight	One similar desktop USB model lists 80 g . Amazon

4. Functional Description

The device is a **desktop short-range UHF tag reader/writer** intended for workstation use. In keyboard-emulation mode, when a tag is presented within the effective read area, the device automatically outputs the tag data to the active input cursor in software such as Excel, ERP, WMS, web forms, or POS applications. Hyper RFID

5. Typical Applications

- Asset and equipment registration
- Warehouse receiving and shipping stations
- Inventory counting desks
- Access or ID data entry into PC software
- RFID tag testing and programming at a workstation Hyper RFID +1

6. Important Notes

- I did **not** find a confirmed OEM/manufacture datasheet PDF for **UHF100U-TC** itself.
- Several specs online appear copied across similar desktop UHF readers, so **read/write distance, exact protocol support, dimensions, and transmit power should be confirmed with the seller before purchase.** Alibaba +1

7. Clean Short Form

UHF100U-TC is a **plug-and-play desktop UHF RFID reader/writer** for the **860–960 MHz** band, with **USB / Type-C connection, keyboard-emulation output, LED/buzzer indication,** and support for **ISO 18000-6C / EPC Gen2** tags. It is designed for simple PC-based tag capture in inventory, warehousing, office, and asset-management workflows. Alibaba +1

I can also turn this into a **clean PDF-style datasheet sheet** next.

okay, please

I'm formatting it into a clean one-page datasheet and will keep the uncertain specs clearly marked so it reads like a proper product sheet.

I've confirmed a directly matching seller listing and a closely matching keyboard-output product page. I'm packaging the sheet as a clean compiled datasheet and labeling the

uncertain fields so it stays technically honest.

Thought for 1m 55s

Done.

Download the PDF datasheet

It is a clean one-page compiled datasheet for **UHF100U-TC**, with uncertain specs clearly marked.

give me the price for this product

I'm checking current seller listings for UHF100U-TC so I can give you a recent market price instead of a stale estimate.

Thought for 15s

The most recent price I found for **UHF100U-TC** is **US\$19–49 per piece**, with **MOQ 1** on Alibaba for the matching WYUAN desktop UHF RFID reader listing that includes the **UHF100U-TC** variation. Alibaba +1

Price summary

- **Product:** UHF100U-TC
- **Recent listed price:** US\$19–49 / unit
- **Minimum order:** 1 piece Alibaba +1

Notes

The listing shows this as a **variation-based price range**, so the exact price can change depending on options such as model variant and read/write configuration. Alibaba

Shipping was **not fixed on the page** I checked; it says the **shipping fee and delivery date are to be negotiated with the supplier.** Alibaba

If you want, I can also give you:

- a formal quotation-style price sheet
- the price converted to KRW

- a comparison with similar UHF desktop readers
