

I am looking for the catalog for nonferrous metal extrude

I'll verify direct PDF links instead of giving you weak product-page links. Some catalogs move around, so I'll prioritize direct manufacturer PDFs that open/download cleanly.

Thought for 5s >

Here are **direct PDF download links** for non-ferrous metal extrusion catalogs:

Catalog PDF	Direct download link
Profall — Standard Aluminum Extrusion Profiles	https://www.profall.com/hubfs/Standard%20Aluminum%20Extrusion%20Catalog.docx.pdf ↗
Extrude-A-Trim — Aluminum Extrusions Catalogue	https://extrude-a-trim.com/wp-content/uploads/2023/03/ExtrudeATrim_Catalogue-1.pdf ↗
Hydro — Big Aluminium Profiles Standard Catalogue	https://www.hydro.com/globalassets/01-products--services/extruded-profiles/benelux/link-buttons/standard-profiles---big-extrusions.pdf ↗
Hulamin — Aluminum Extrusions Standard Profile Catalogue	https://www.hulamin.com/sites/default/files/downloads/Standard%20Profile%20Catalogue%202016%20Low.pdf ↗
Finkelstein Metals — Continuous Cast & Extruded Copper-Alloys / Bronze / Brass	https://finkelstein-metals.com/wp-content/uploads/2015/08/Finkelstein-Catalogue.pdf ↗
Pioneer Metals — Brass, Bronze, Niche Copper Alloys Catalogue	https://pioneermetals.com/wp-content/uploads/2025/06/Pioneer-Metals-Catalogue.pdf ↗
Copper and Brass Sales — Copper & Alloys Stock Guide	https://tkcopperandbrass.com/wp-content/uploads/2018/05/Copper-and-Alloys-Stock-Guide.pdf ↗
Belco — Aluminum Extrusion Equipment Brochure	https://www.belcoind.com/wp-content/uploads/2019/06/belco-extrusion-equipment-brochure.pdf ↗
Aluminum Extrusion Manual — AEC 2018	https://tricityextrusion.com/roxyfileman/uploads/AEC_2018_Aluminum_Extrusion_Manual.pdf ↗
Non-Ferrous Metals Catalogue — United Cast Bar	https://www.unitedcastbar.com/fileadmin/user_upload/downloads/brochures/United_Cast_Bar_Brochure_NF_Metals_EN.pdf ↗

Best match depends on what you need:

- For aluminum extrusion profiles, use **Profall**, **Extrude-A-Trim**, **Hydro**, or **Hulamin**.
- For copper/brass/bronze extrusion, use **Finkelstein Metals**, **Pioneer Metals**, or **Copper and Brass Sales**.
- For extrusion machine/equipment, use **Belco**.

give me the detailed info for each items in here

I'll expand the same catalog list into a practical “what it contains / what it is good for / material scope” table, and I'll verify the source details while doing it so the links stay grounded.

Thought for 15s >

Below is the detailed info for each catalog PDF I listed.

#	Catalog PDF	Main material / product	What is inside
1	Profall — Standard Aluminum Extrusion Profiles	Aluminum extrusion profiles	Standard aluminum profiles with simple shapes and dimensions. It includes round bars, flat bars, square bars, angles, U-channels, T-profiles, H-sections, tubes, trim profiles, transition strips, picture

#	Catalog PDF	Main material / product	What is inside
			frames, handles, water deflectors, and curved/corner profiles. The catalog says its standard profiles are commonly made from 1050, 1070, 3103, and 6060 aluminum alloys , with typical dimensional tolerance around ±0.15 mm . ProFall +1
2	Extrude-A-Trim — Aluminum Extrusions Catalogue	Aluminum trims, channels, bars, tubes, angles, and accessories	This is more of a commercial aluminum extrusion stock catalog. It includes many ready-to-buy profile types such as channels, angles, trims, bars, hollow tubes, and related finishing/adhesive accessories. The company also provides separate downloadable PDF sections by profile type. Extrude-A-Trim +1
3	Hydro — Big Aluminium Profiles Standard Catalogue	Large aluminum extrusion profiles	This catalog is for larger standard aluminum extrusion profiles from Hydro. Hydro is a major global aluminum company with extruded-profile product lines. hydro.com
4	Hulamin — Aluminum Extrusions Standard Profile Catalogue	Aluminum standard profiles	Hulamin is a South African aluminum semi-fabricator producing rolled and extruded products. Its extrusion profile catalog is useful for standard aluminum shapes used in engineering, automotive, construction, and manufacturing sectors. Hulamin +1
5	Finkelstein Metals — Continuous Cast & Extruded Copper-Alloys / Bronze / Brass	Copper alloys, brass, bronze, aluminum bronze	This is a non-ferrous metal catalog focused on continuous cast and extruded bronze/copper alloys . It includes extruded brass products and special copper alloys. Finkelstein describes itself as a specialist in extruded non-ferrous metals, especially brass and aluminum bronze alloys. Finkelstein Metals +1
6	Pioneer Metals — Copper / Brass / Bronze / Niche Copper Alloys Catalogue	Copper, copper alloys, brass, bronze	Pioneer Metals produces semi-finished copper and copper-based alloy products. The catalog describes products cast as billets, rods, and hollows , supplied to downstream extrusion and forging companies. It also lists copper grades such as sulphur copper and tellurium copper, plus bronze and brass materials. Pioneer Metals +1

☰ SMS Search

⬆ ⋮

	— Copper & Alloys Stock Guide	stock shapes	NA covers copper and copper alloy products in many stock shapes and sizes. The source says it includes one of the largest selections of copper and alloy sizes and shapes, plus helpful technical data. Copper Brass Sa... +1
8	Belco — Aluminum Extrusion Equipment Brochure	Aluminum extrusion production equipment	This is not a profile catalog. It is an equipment brochure for aluminum extrusion plants. It covers extrusion-system equipment such as furnaces, hot log saws, handling systems, die ovens, age ovens, pullers, washers, ovens, spray booths, and finishing systems. Finishing &... +1
9	Aluminum Extrusion Manual — AEC 2018	Aluminum extrusion technical guide	This is a technical/manual-style document, not a product catalog. It explains aluminum extrusion fundamentals, design considerations, tolerances, alloy selection, process limitations, and manufacturing guidance. M&K Meta... +1
10	United Cast Bar — Non-Ferrous Metals Catalogue	Non-ferrous cast bar materials	This one is more focused on non-ferrous cast bar products rather than extrusion profiles. It is useful for bronze/copper alloy bar-type materials and stock selection.

My recommendation:

For **aluminum extrusion profiles**, start with **Profall, Extrude-A-Trim, Hydro, and Hulamin**.

For **copper/brass/bronze extrusion**, start with **Finkelstein Metals** and **Pioneer Metals**.

For **extrusion production machines**, use **Belco**.

For **technical understanding**, use the **Aluminum Extrusion Manual**.

give me the recent price for each item

I'll treat "price for each item" as the **typical current market price/quote range for the product category represented by each catalog**, because many of these catalogs do not publish fixed list prices. Industrial extrusion profiles and equipment are usually quote-based, so I'll separate "public price found" from "estimated market range."

Thought for 20s >

Here are the **recent price estimates** for each catalog item. Important: most extrusion suppliers do **not** publish fixed prices, because price depends on alloy, profile weight, die/tooling, finish, order quantity, country, and shipping. So these are **current public-market reference ranges**, not guaranteed factory quotes.

#	Catalog / item	Recent price estimate	Notes
1	Profall — Standard Aluminum Extrusion Profiles	~US\$2.50–3.80/kg for standard aluminum extrusion profiles	Good reference for common aluminum bars, channels, tubes, trims, and profiles. 2025–2026 public supplier guides show standard aluminum extrusion around US\$2.50–3.80/kg , while basic 6063 prof are often around US\$2.50–3.50/kg . Ya Ji Aluminum [...] +1
2	Extrude-A-Trim — Aluminum Extrusions Catalogue	~US\$3–8/kg bulk, but small retail pieces can be much higher	This is more like a stocked profile/trim catalog. Bulk aluminum extrusion pricing is close to the standard profile range, but small retail lengths are usually priced per piece/meter and can be much more expensive. Alibaba listings for 6063 aluminum profile show examples around US\$2.60–3.20/kg , while retail profile pieces can be much higher. Alibaba +1
3	Hydro — Big Aluminium Profiles Standard Catalogue	Usually quote-based; roughly US\$3–6/kg+	Large aluminum profiles need quotation because die size, profile complexity, tolerance, temper, surface treatment, and MOQ matter a lot. As a rough reference, standard profiles are about US\$2.50–3.80/ while more complex custom profiles can be US\$3.50–5.00/kg or higher. Ya Ji Aluminum [...] +1
4	Hulamin — Aluminum Extrusions Standard Profile Catalogue	~US\$2.50–4.50/kg	For normal industrial aluminum extrusion profiles, use the same aluminum profile benchmark range. The base aluminum market is al high: Trading Economics showed aluminum around US\$3,578/t on M 11, 2026, before extrusion processing, finishing, margin, and freight. Trading Econom... +1
5	Finkelstein Metals — Extruded Copper-Alloys / Bronze / Brass	Brass: ~US\$6.50–15/kg; Bronze: ~US\$8–18/kg; Copper alloy: often US\$10–25/kg	This catalog is for copper alloys, brass, bronze, and aluminum bronze. Recent public listings show brass bars around US\$6.50–15/kg , bronze bars around US\$6.50–16/kg , and pure copper bars often higher depending on purity and form. Copper itself is expensive now: Kitco showed live copper around US\$6.21/lb , about US\$13.70/kg , on May 12, 2026. Alibaba +2
6	Pioneer Metals — Copper / Brass / Bronze / Niche Copper Alloys	~US\$10–25/kg depending on alloy	Pioneer-type products are more semi-finished copper/copper-alloy materials. Current marketplace examples show copper/brass/bronze industrial products around US\$10–12/kg for some sheets/plates and US\$10–13/kg for brass bars, while higher-purity copper and specialty alloys can be higher. Made-in-China +2
7	Copper and Brass Sales — Copper & Alloys Stock Guide	Copper stock: roughly US\$14–25/kg; brass/bronze stock: roughly US\$8–18/kg	This is a stock-shape catalog, not a fixed-price list. Copper raw mark price is currently high, with Kitco showing copper around US\$6.21/lb and Westmetall listing LME copper cash settlement at US\$13,673/t c May 11, 2026. Stock bars/rods/tubes cost more than raw metal because of processing and distribution margin. Kitco +1

#	Catalog / item	Recent price estimate	Notes
8	Belco — Aluminum Extrusion Equipment Brochure	Single puller: ~US\$17,500–120,000; complete extrusion line: ~US\$700,000–900,000+	This is equipment, not metal material. Public machinery listings show aluminum extrusion pullers from about US\$17,500–120,000 , one major in-China puller example at US\$48,500/piece , and a 7-inch/2000UST whole extrusion line around US\$700,000–900,000 . Alibaba +2
9	Aluminum Extrusion Manual — AEC 2018	PDF/manual itself: free; aluminum extrusion product cost: ~US\$2.50–5/kg	This is a technical guide, not a product catalog. If you use it to estimate manufacturing cost, standard aluminum extrusion is commonly around US\$2.50–3.80/kg , while complex custom profiles can reach US\$3.50–5.00/kg or more. Ya Ji Aluminum [...] +1
10	United Cast Bar — Non-Ferrous Metals Catalogue	Bronze/cast bar: roughly US\$8–18/kg; specialty bronze can be US\$12–20/kg+	Cast bronze/copper alloy bar pricing depends heavily on alloy grade. Public bronze bar listings show examples around US\$8.30/kg , US\$9.50–10/kg , and aluminum bronze around US\$12–16/kg . A 2026 bronze market note also put European bronze around US\$18.78/kg January 2026. Alibaba +1

Simple buying estimate:

For **aluminum extrusion profiles**, expect around **US\$2.50–5.00/kg** for bulk orders.
For **brass/bronze/copper alloy extrusions**, expect around **US\$8–25/kg** depending on alloy.
For a **complete aluminum extrusion production line**, expect roughly **US\$700,000–900,000+**, and sometimes much more depending on press tonnage, furnace, handling table, puller, saw, aging oven, and automation level.
