

UHF100U-TC

Compiled Datasheet Summary • Desktop UHF RFID Reader / Writer with USB Keyboard Output

Product Overview. UHF100U-TC is a compact desktop UHF RFID reader / writer for PC-based tag capture. Matching seller listings describe a plug-and-play USB / Type-C device with keyboard-emulation output, allowing tag data to be entered directly into the active cursor position in software such as Excel, browser forms, ERP, WMS, or asset tools. No official manufacturer PDF datasheet was located during verification, so this sheet compiles specifications from matching and closely related vendor listings.

Key Features

- 860 - 960 MHz UHF operation
- USB / USB Type-C desktop interface
- HID-style keyboard emulation output
- Plug-and-play use for standard PC software
- Built-in buzzer and status LED
- Short-range desktop read / write operation

Technical Specifications

Parameter	Specification
Model	UHF100U-TC
Device type	Desktop UHF RFID reader / writer
RF band	860 - 960 MHz
Protocols	ISO 18000-6C / EPC Class 1 Gen 2 confirmed on matching listings; ISO 18000-6B appears on some similar desktop models but was not directly confirmed for UHF100U-TC.
Host interface	USB or USB Type-C
Output mode	Keyboard-emulation / HID-style text output to active cursor field
Power supply	DC 5 V via USB
Indicators	Buzzer and LED indicator
Read / write range	Seller-dependent and strongly tag-dependent. Matching listings indicate short desktop range; figures seen online vary from about 0 - 100 cm overall, with shorter write range.
Construction	ABS + acrylic listed by one matching seller
Typical use	Asset tracking, warehousing, inventory desks, test stations, PC-based tag entry

Integration Notes

In keyboard-emulation mode, the device behaves similarly to a barcode scanner: when a compatible UHF tag is presented, the tag data is transmitted as typed text into the software field currently holding the cursor. This makes integration simple for spreadsheets, browser forms, and desktop management software.

Verification note. No official manufacturer PDF datasheet was found for model UHF100U-TC during this check. This document is a compiled summary based on a directly matching seller listing and closely matching UHF desktop keyboard-output reader pages. Confirm protocol set, exact connector type, and guaranteed read / write distance with the seller before procurement.
