

Sheet Metal Deburring Machine

This is a professional equipment that can remove burrs and flashes automatically from metal workpieces, and perform chamfering, wire drawing & descaling, in this way, improving workpiece precision and quality. It has been widely used in aerospace, medical device, engineering machinery, NEVs, shipbuilding and so on

- Worktable Width: 800/1000/1300 [mm]
- Min. Size of Workpiece: 50*50*0.5 [mm] (Nonporous Plate)
- Workpiece Thickness: 0.5-80 [mm]
- Max. Load of Worktable: 300/500 [kg]

FAQ

Serve as Sheet Metal Surface Finishing Tool

Replacing manual grinding, it can perform deburring, chamfering, wire drawing and descaling and make sheet metal surface smoother, flatter in one step, so that you can eliminate micro-burrs that may affect product quality, meeting requirements of precision machining.

Worktable Width	Min. Size of Workpiece
800/1000/1300mm	50*50*0.5mm (nonporous plate)
Workpiece Thickness	Max. Load of Worktable
0.5-80mm	300/500kg

Deburring Machine Demo

High Processing Capability Benefiting from Advanced Configurations

Handle most sheet metals and machined parts. Variable frequency drive offers a speed higher than other conventional models. As a result, deburring and descaling are

Rugged Construction with Long Service Life

Its bed features a thickened mortise-and-tenon profile frame for high precision. It undergoes multiple treatments to ensure no deformation over time. Moreover, it is easy to lift and forklift this machine for users.

Vacuum/Marble Magnetic-adsorbing Worktable

Magnetic force/negative pressure is used to securely hold magnetic metals (carbon steel)/ non-magnetic materials (stainless steel, AL, copper) in place respectively. As thus, workpieces will be fixed firmly and never move during high-speed grinding.

Intelligent CNC System for Safe & Reliable Operations

The system is outfitted with SIEMENS PLC and 10" touch screen, so, it is easy to take smart, centralized control to set up working speed at will. Thanks to emergency stop, overload alarm, abnormal shutdown and other safety devices, potential downtime risks will be minimized.
